Introduction

This report is the compilation of data collected from Montana public libraries for the fiscal year, July 1, 1987-June 30, 1988. Included are a presentation of statistics reported by the libraries as well as selected per capita computations.

The 83 main libraries in the state have been assigned to one of six groups, based on sizes of populations served. The parameters of each group, (0-599; 600-1,159; 1,160-2,499; 2,500-4,999; 5,000-19,999; 20,000-80,500) were based on an attempt to organize libraries into the most homogeneous groups possible for purposes of comparison by users of this report. The parameters were not based on legal service areas; rather on sizes of communities served, because community size comes closer to reflecting actual numbers of persons served.

The data requested of libraries by the Montana State Library were based on questions designed for the Federal/State Cooperative System (FSCS). FSCS is an effort to develop and to compile standardized national public library statistics. Some states have only recently joined the system. Within the next few years, FSCS organizers expect all 50 states to be involved.

Except in cases where data supplied was illogical or when there appeared to be a typographical error the data presented in this publication are as reported by the participating libraries. Some libraries did not return their statistical report forms and others returned them with very little information supplied. It is hoped though, that, because the majority of libraries contributed to the project, this report will be of use to those working on budgets or researching specific library topics.

Included at the end of the presentation of statistics is a copy of the report form used by the libraries as well as the instructions for completing the form. Questions arising while using this report may be answered by referral to the report form or instructions.

Comments and questions are very welcome concerning the design of the form and/or the wording of the questions.

PLEASE NOTE THE FOLLOWING BEFORE USING THIS REPORT:

1. Public libraries receive support from various sources. The columns headed "Service Area" indicate the population of the area which the library is legally bound to serve. In many cases this number does not accurately reflect the actual numbers served on a day-to-day basis. In some cases, libraries supported by county monies are bound to serve the whole county but realistically, the library is used only by inhabitants of the limited area surrounding the library. Therefore, this report also includes columns headed, "Pop. Area." Population area is the population of the city, town or area (taken from 1986 U.S. Dept. of Commerce report) which reflects the size of the pool of persons from whom the library users actually come. **Nevertheless, columns indicating "Percent registered" and "Per capita income" are based on population of service area.**

2. On Table II- "Staff Information," the heading "ALA Masters" indicates numbers of librarians with masters degrees from American Library Association (ALA) - accredited programs. "Other Masters Degree" indicates number of librarians with masters degrees in any other subject.

3. Coal Severance tax (CST) income was not included in the income figures for the libraries because many libraries were not able to indicate amount of support they received from CST revenues. CST revenues are distributed through the State Library to federation headquarter libraries, who in turn distribute revenue to the libraries in their federations. In Fiscal Year 1987/88 public libraries received $229,915 in support from coal severance taxes. Broad Valleys federation received $46,186; Golden Plains received $24,184; Pathfinder received $40,140; Sagebrush received $28,483, South Central received $42,588 and Tamarack received $48,334.

4. Public service hours per week indicated in Table VII include the hours of library branches. For example, if Library A is open from 8 to 5 Monday through Friday. Its branch is open from 12 to 7 Monday through Friday. Library A would report its own total number of public service hours, 40 plus any extra hours that its branch is open at times when Library is closed, 10, for a total of 50 public service hours. If Library B is open from 8 to 5 Monday through Friday and its branch is open from 8 to 5 Monday through Friday, Library B would report 40 total public service hours.

5. The data included in this report for libraries with branches includes in its totals data for the branches because most libraries do not keep separate statistics for their branches.

12. A typical week is one in which the library is open its maximum number of hours. Include both main and branch library hours in the following way: If the main library is open 40 hours per week, Monday through Friday from 9 to 5 and its branch is open the same 40 hours per week, you should report "40" for question 12. However, if the main library is open 40 hours per week, Monday through Friday from 9 to 5 and its branch is open 10 hours a week from 5 to 7 Monday through Friday, you should report "50" for question 12.

13. TOTAL ESTIMATED USERS PER WEEK-- Report the total number of persons entering the library for any purpose per typical week. An efficient method for counting library users is in Output Measures for Public Libraries 2nd edition, which was distributed to many Montana public libraries. Copies are available from the State Library.

14. IN-LIBRARY USE OF MATERIALS PER TYPICAL WEEK-- Report the total number of materials used in the library, but not checked out. Output Measures for Public Libraries suggests an efficient method for counting materials used in the library.

knowledge, use, recommendations, interpretation or instruction in one or more information sources by a member of the library staff. Do not include directional transactions such as, " What time is story hour?" "How do I use the copy machine?"
